RAISE YOUR EXPECTATIONS

> Customized User Interface

> Simplified Operation

> One-Touch Functions

> Built for How You Work and Communicate

RAISE YOUR EXPECTATIONS.

At Toshiba, our long history of industry-leading innovation has led to some of the most powerful, versatile MFPs available. Now, we're taking that impressive functionality to the next level with Elevate—the easy-to-use, super efficient user interface. Your MFP's user interface can be tailored to suit the way your business operates, simplifying both common and sophisticated tasks.

Your employees can quickly learn how to perform your automated custom one-touch functions and newly discovered features with minimal effort. Need to scan to an automated workflow or copy an odd-sized, mixed-original job, Elevate helps you make these complicated tasks as simple as the touch of a button. Elevate also helps increase document security by simplifying the process of protecting printed and scanned documents.

Simple One-Touch Functions

ELEVATE STREAMLINES COMPLICATED MULTI-STEP PROCESSES INTO AUTOMATED, ONE-TOUCH FUNCTIONS.

> Customize and automate workflows specifically around your business processes

> Boost productivity by reducing manual and paper intensive processes in the office

> Personalize the user interface by department to deliver the utmost efficiency

> Cost savings and greater efficiency through improved workflow and productivity

> Clear away clutter and confusion on home screen by presenting only the tasks used most

Unparalleled Personalization

With Elevate, MFPs are no longer a one-size fits all commodity. Understanding the individual needs of each and every client is what Toshiba does best. Elevate unlocks the full potential of your MFP and provides customized and automated workflows designed specifically around your business processes. The user interface can also be personalized by department within your organization ensuring that it delivers the utmost in efficiency throughout.

Effortless Simplicity

With its intuitive layout and design, the Elevate user interface simplifies operation like never before. It streamlines complicated, multi-step processes into automated, one-touch functions. Those functions are then presented directly on the home screen in an organized and uncluttered manner.

Multiple Steps with a Single Touch

Because time is money, reducing the number of steps in a given task translates directly into savings and greater efficiency. Especially when you multiply that by the number of employees performing those steps every day.

Uncomplicated Compatibility
Elevate is easy to customize and works with all the latest Toshiba MFPs.

Let Your Work Flow

Elevate enables your MFP to become an integral part of daily business operations by integrating with industry leading document workflow and enterprise content management applications. In doing so, the MFP becomes an on-ramp to digital document workflow and boosts productivity by reducing manual and paper intensive processes in the office.

Customized Help

Imagine the various steps that could be customized, combined and automated to help your business run more smoothly, and more efficiently. That's precisely what we've been doing here at Toshiba. So, whatever your industry, whatever combination of steps you perform, Elevate enables you to raise your expectations as you step outside the "out-of-the-box solutions."

Designed with You in Mind

Toshiba is dedicated to finding solutions that meet each one of our customer's unique needs. Elevate includes a number of sample user interfaces specifically designed for a variety of different industries and operational processes.

If your needs are even more specific, our services team can help you create your own, fully customized solution. Examples include, but are not limited to, the following:
